

To: everyone@cs.kun.nl  
From: adridg@cs.kun.nl  
Subject: colloquium computer science

Date: 1-4-00 time: 8.47

Today, April 1st, at 16:00:00 sharp,

Dr. G. Aapenstaart

of Schmetterling & Dubois B.V. will give a talk in CZ N4. There will be coffee and cookies in the hall 15 minutes before the talk starts. The Subject will be:

“Automatic Consultant Agents in the Public Health Care Domain”

Computer Engineering in the medical public health care is quite a weighted subject. Most of the doctors still aren't into, what they call, “computer business”. Anyway, there recently was a small pilot project on the subject of diabetics: a small breakthrough. The results of this case will be presented, and there'll be a small demonstration on the functionality of the system.

Drinks afterwards.

Cheers,

Ade
